James Teacher		Victoria School
(Supervising Teacher)		(Name of School)
Purpose of the Experiment: (Project Title)		
Quad Strength and Range of Motion Testing		
I am doing an experiment for the Vancouver Island Regional Science Fair to see how stretching affects quadriceps strength and range of		
motion.		
What is required of the student participant:		
Before doing any other physical activity (such as skating) participants will be asked to do		
a simple range of motion test and strength test on the quadriceps of both legs before and after		
stretches.		
The only rick involved in norticinating in this even winners	tie musele etrein. But Lwill	
The only risk involved in participating in this experiment is muscle strain. But I will be asking the participant to work within his/her range of comfort when doing the stretches and		
the strength tests, so there is little chance of straining anything.		
and strength tests, so there is have orientee or straining arrything.		
All names and corresponding information will be kept confidential. The participant is free to stop doing the experiment at any		
time.		
Parental permission is required
