

We train teens to shape the future

Vancouver Island Regional Science Fair x TKS - Special Opportunity for High School Students

We just learned that applications are open for an incredible extracurricular program for high school students and wanted to share it with the Vancouver Island Regional Science Fair's community. TKS students have gone on to win prestigious awards and science fairs, they'd love to invite you to level up your project next year!

[The Knowledge Society \(TKS\)](#) is a 10-month global innovation program for students ages 13-17 who want to solve the world's biggest problems. The program is modeled after curriculums from Harvard, Stanford, and MIT, and designed to replicate the learning environments of Google and Facebook. They've also been recognized by organizations like the World Economic Forum.

What students do in TKS:

1. Learn about the future and how **emerging technology** is disrupting the world, including Artificial Intelligence, Genetic Engineering, Space Tech, and Quantum Computing + 20 more.
2. Access **mentors** from companies including Google, Tesla, Apple, Microsoft, BenchSci, and more.
3. Work with **global organizations** to solve real challenges using advanced problem-solving frameworks. This year, TKS students are working with the United Nations.

4. Be part of a **global community** of like-minded young people where they can meet their best friends and future co-founders among 1200 students and alumni from 20 countries.
5. Get training from Olympic-level **innovation coaches** to help them discover their interests and build meaningful projects.
6. Accelerate their personal growth by training the **mindsets, mental models, and habits** of world leaders and CEOs.
7. Develop their **personal portfolio** of masters-level projects to earn access to exclusive opportunities including internships, conferences and guest speakers.

Application Process and Tuition Support

Before joining TKS, students go through an application and interview process to be selected. No prior experience in tech is necessary, TKS is looking for students who are curious, ambitious and want to make an impact.

They offer generous tuition support for families, and are offering up to 100% tuition support for high potential students with demonstrated need.

[Apply by July 25 - Extended Deadline for Vancouver Regional Science Fair Students](#)

If you have questions about the program you can [check out these mini info sessions](#) or email mia.nguyen@tk.world.
